Program Plan Outline Template

Program Plan Outline

Group#	Group 6, Stress Management and Mindfulness	
Facilitation Technique		
Student Names	Alisha Quizi, Karani Puvanesan	
Selected Population	Youth 12+	
Program Title	Mindfulness Retreat Room Cognitive Diffusion (The Weight of Words)	
Statement of Purpose	To support youth in demonstrating awareness of mindfulness techniques to bridge the gap between mental health education and youth engagement through experiential learning.	
Program Goal -Write one (1) program goal using the format discussed in class, must relate to the purpose statement	- Reduce Stress - To gain knowledge of mindfulness techniques / To demonstrate mindfulness skills independently To co-create an engaging, interactive platform (combining a physical/digital escape room and a web companion) that teaches youth aged 12+ practical mindfulness and stress-management techniques through gamified problem-solving.	
Program Objectives -Write two (2) specific program objectives that will lead to goal attainment (must include a condition, behaviour and criterion)		
Content & Process	**CONTENT**	**PROCESS**
-Preparation		

-Introduction	- Jenny mentioned the drawing idea to destress	
-Active Engagement / Experience Phase	<u>Mindfulness Art: Draw Your Emotions</u> Description of the activity * Provide different prompts and ask participants to draw a picture related to the emotions. Example prompts (Choose 1) - Draw what happiness looks like to you - Draw what calmness looks like to you - Draw what sadness looks like to you - Draw what frustration look like to you Youth will identify personal stressors, externalize them by writing them down, and practice the emotional act of letting go	**Core Lesson:** Learning that thoughts are not necessarily facts. Youth practice identifying heavy cognitive loads and actively letting them go. • **Puzzle Mechanic**: A heavy barrier blocks a path, weighed down by dense, heavy bricks labeled with common teenage anxieties ("Fear of Failure", "Perfectionism", "Isolation", "Not Good Enough"). To clear the path, youth must physically remove the bricks and drop them down a "shredder/recycle chute." Clearing the weight triggers an internal scale mechanism, opening the next doorway. • **Website Integration**: The "Digital Burn Bin." A simple, private text interface on the website where youth can type out an intrusive thought and click "Release into the Sky," watching the text visually dissolve.
-Closure	* Reflection period about what they did during the activity. Ask participants which mindfulness techniques they enjoyed the most. (What Happened) * Ask the participants to reflect on their feelings. How does the activity make you feel, and what does that mean? (So, what does it mean) * Ask about how the participant will utilize these techniques in their daily lives (What comes next)	Debriefing Techniques: Go around
-Post-Tasks		

Implementation Description

Target Population	
Preparation Instructions for Facilitators (Include Risk Management)	
Materials/Equipment	

Evaluation Plan

Plan for Evaluating the Quality of the Program	
Plan for Evaluating the Program Outcomes
